Answers  
Incomplete Dominance:

Definition, Examples, and  
Practice Problems You may  
already know that in the  
study of genetics, dominance  
refers to the relationship  
between alleles, which are

# Read Online Genetics Practice Problems

two forms of a gene. In a dominant relationship between alleles, one allele “masks” the other and influences a specific trait.

*Incomplete Dominance:  
Definition, Examples, and  
Page 13/46*

## *Practice*... Incomplete Dominance

Solving Genetics Problems.

There is no dominant or recessive, the heterozygous condition results in a "blending" of the two traits. Example: Snapdragons can be red, white, or pink

# Read Online Genetics Practice Problems

(heterozygous) Incomplete dominance - neither allele is dominant, red x white = pink  
Codominance - both are expressed in some way, red x white = white/red spots
