GROVE ball valves can be provided with optional stem extensions to permit buried or underground installations in remote or inaccessible areas. When used for buried service, the stem extensions can be furnished watertight, and the piping of the grease injection system also will be extended. When ordering extensions, please

GROVE B4, B5, and B7 Side-Entry Ball Valves

The GROVE Top Entry ball valve is designed to be maintained in line. The bolted construction allows disassembly on-site for inspection and possible repair. Removal of the bolted bonnet from the valve body allows access to the ball and seats which can be removed with special maintenance tools, designed by GROVE.

GROVE BT1 & BT2 Top Entry Ball Valves - Schlumberger

GROVE BT2. The top-entry GROVE BT2 valve is an advanced design of top-entry ball valves, manufactured in a wide range of diameters and pressure classes. In the standard versions, the valve is suitable for transmission pipelines, pumping, compression and reinjection units, offshore platforms, onshore terminals, pig traps, measuring stations, and surge-relief skids.

Ball valves are designed with a ball inside the valve. A ball valve is a form of quarter-turn valve which uses a hollow, perforated and pivoting ball (called a "floating ball") to control flow through it. It is open when the ball's hole is in line with the flow and closed when it is pivoted 90-degrees by the valve handle.

Why use a ball valve vs globe valve? | Difference between ...

For large diameter valves a full port ball valve or plug valve is recommended or more rapid depressurization. Keep in mind that the Grove B-5 valve is designed with a hole drilled through the top of the ball. This means that the ball must be in the fully closed position in order to drain the body cavity.

Valve operation works by operating the valve handle 90°turn counter-clockwise to open, and 90°turn clockwise to close. All standard valves are bidirectional and as such, can be installed for flow in either direction. Valves which are unidirectional will have a flow direction arrow welded to the body and separate assembly instructions.
