Honey is the sweet liquid honey produced by the bees, and honey combs are essential for the process. Workers make just about 1/6 of a teaspoon of bee-wax per hour in their brief lives. An average worker bee will see around 100 flowers on one foraging trip; a large colony will eat up to 200 pounds of honey a year.

*Do Bees Make Honey? - Wise Beekeeping*

To keep bees, you need a beehive. In the wild, bees build their own hive, usually in a hollow tree trunk or another sheltered place, but it can be anywhere. As a backyard beekeeper, you will provide a man-made hive for your bees so you can help maintain the colony and easily harvest the honey.

*A Beginner's Guide to Beekeeping - Make Your Best Home*

How Do Bees Make Honey? Bees take nectar, which is a sweet sticky substance exuded by most flowers and some insects (honeydew), and mix it with enzymes from glands in their mouths. This nectar/enzyme mix is stored in hexagonal wax honey comb until the water content has been reduced to around 17%.

*Honey | British Beekeepers Association*

Extra layers known as 'supers' are placed above the brood box. One super at a time, as the bees fill the sheets of wax comb with honey. When all the sheets in a super are sealed with wax the keeper can remove the super. This is then spun to

*3 Ways to Keep Bees - wikiHow*

Keeping bees requires small amounts of regular time with the bees. You typically have to spend around half an hour per week with a hive. You can do this at the weekend or, if the weather is still good, when you return from work. Most beekeepers would like to spend more time with their bees rather than less, as beekeeping is highly addictive.

Honey farming is the process of collecting honey bottles and honeycombs from beehives and bee nests. To get honeycombs, you can use shears when the beehive or bee nest has reached honey\_level 5. Honeycomb is used for crafting your own beehives or bee nests for bees to inhabit, as well as for crafting decorative honeycomb blocks.
