Land Rover Defender Gearbox | Transfer Box - Paddock Spares

Ashcroft Transmissions is a UK based company specialising in the supply of rebuilt manual and automatic gearboxes, transfer cases and differentials to suit Land Rover, Range Rover, Discovery and Freelander 4x4 vehicles.

Ashcroft Transmissions

On a Land Rover, the Transfer Box is also responsible for locking the central differential between the front and rear propshafts. Specifically, the Transfer Box transfers power to the front propshaft, which is also connected to the differential, which sends on power to the rear propshaft. When the differential is locked, it is effectively removed and power to both axles is constant.

Land Rover Transfer Boxes - Land Rover Expedition

With a 31.73" tall tyre (235/85R16) and the 1.41:1 transfer box with a 0.83:1 5th -- (standard Defender) 3000rpm = 68.4mph. With a 28.91" tyre (205/80R16) and the 1.22:1 transfer box with a 0.83:1 5th -- (standard Discovery 1) 3000rpm = 72mph. Very similar. With a 31.73" tall tyre (235/85R16) and the 1.22:1 transfer box with a 0.83:1 5th. 3000rpm = 79mph

Choose Your Model - Land Rover Defender - Land Rover UK

There are three bolts down each side attaching the transfer box to the main box and it is the middle of the three on the right hand side that causes the problem. On earlier transfer boxes a "stud" was fitted in this position to reduce the possibility of error. Sometimes the stud is omitted on later boxes or rebuilds.
