Hair loss - Women and hair loss: coping tips - NHS

Traction alopecia is a hair loss condition where the hair follicle sustains damage because of too much pressure being placed on the shaft. Hair loss won't develop overnight due to a tight braid or pony tail but when placed under this kind of stress over long periods of time, the hair shaft gradually weakens and the production of hairs first slows, then stops completely.

## Scalp Yeast Infection: Causes, Symptoms, and Treatments

Drugs, especially illegal drugs, can interrupt the hair cycle by tricking the follicles into premature rest or stopping the mitotic activity of the cells altogether. 1 The result is noticeable hair loss after frequent and long-term use. For many drug users, this can not only be visibly unappealing to them, but can also lead to mental issues like decreased confidence and self-esteem.

## How Addiction Affects Hair | Banyan Mass

Stress can be a major factor in hair loss, especially when your stress is severe or lasts for a long time. Try to determine the cause of your stress in the first place, and your hair should return to normal and regrow within a few months' time, if this is the only cause of your hair loss.

## Can Stress Lead To Hair Loss? | Superdrug Online Doctor

4) Regarding ringworm, I also think you don't have that. This infection causes hair loss itself, so you should have started losing hair in the area after the first symptoms. Instead, your hair loss was surely caused by the injections – so you probably don't have any ringworm (plus the fact that your husband didn't catch it).
